

CLEAN AIR #2344

Bacterial & Odor Control for HVAC Systems

Features:

- EPA registered
- Ready to use, no diluting necessary
- Can be used in occupied spaces – no evacuation necessary
- Lowest EPA Toxicity & Safety rating
- Point-of-contact microbial control
- Effective against gram-positive and gram-negative organisms as well as yeasts, mold, mildew, fungi and algae
- Environmentally safe – no environmentally damaging propellants or flammable ingredients
- No harmful chemical residue - no rinsing required
- Contains no perfumes, masking agents or alcohol
- Respirator is not required
- Easy to apply

Description:

CLEAN AIR's chlorine dioxide formula is a powerful compound effective against a broad range of gram-positive and gram-negative organisms as well as yeasts and molds. This EPA-registered, low-toxicity formula does not cover up odors, it eliminates the source of odor through a release process that destroys organisms at the origin. This product does not contain phenols, chlorine or bromodiols.

Applications:

- Evaporator Coils
- Restrooms
- Apartment Complexes
- All A/C Elements
- Kennels
- Hotel & Motel Rooms
- Athletic Clubs
- Drip Pans
- Fire & Flood Areas
- Marinas
- Lockers
- Cars
- Hospitals
- Dumpsters/Garbage Containers
- Buses

Product Characteristics:

Appearance:	Clear to pale yellow liquid
Odor:	Slight odor of chlorine
pH:	8.0-8.5
Initial Boiling Point/Range:	213°F (100.5°C)
Solubility:	Miscible
Vapor Pressure:	23.7 mm Hg (25°C)
Vapor Density:	0.02 kg/m ³
Relative Density:	1.01 g/ml (20°C)
Viscosity:	0.6409 mm ² /sec
Storage:	Store in a cool, dark area in original container. Do not contaminate water, food, or feed by storage or disposal. Do not reuse container.
Transport Information:	
Proper Shipping Name:	Not regulated for transport
UN Number:	Not regulated for transport
Class:	Not regulated for transport

Directions:

General Odor Control: Apply a liberal amount of CLEAN AIR undiluted to the origin of the odor. For example, apply directly to system ductwork, drip pans, evaporator coils and other areas associated with bacteria, mold, mildew, fungi, yeast and algae.

Microbial Control: First clean and sanitize the system, then apply a liberal and undiluted amount of the product into the system intake while the system fan is running to ensure complete microbial environmental control. One gallon of CLEAN AIR will treat approximately 1000-1500 square feet.
