SECTION 3 – Hazards Information**PRIMARY ROUTES OF ENTRY & EFFECTS OF OVEREXPOSURE:**

EYES: Contact with liquid concentrate may cause irritation accompanied by stinging, tearing, redness, and pain.

SKIN: Contact with liquid concentrate may cause mild irritation. Prolonged overexposure to liquid concentrate can result in defatting and drying of skin which may result in dermatitis. May aggravate existing skin conditions.

INHALATION: Prolonged overexposure to vapors may cause irritation of the respiratory tract, coughing, dizziness, headache, nausea, and loss of coordination. Continued overexposure to vapor concentrations in excess of the accepted exposure limits can lead to more severe central nervous system effects including narcosis, unconsciousness, and even death. May aggravate existing respiratory conditions.

INGESTION: Liquid concentrate, in large quantities, may be harmful or fatal if swallowed. Ingestion may cause gastrointestinal irritation, nausea, vomiting, and diarrhea. Ingestion of sufficient quantity can produce central nervous system effects and may cause damage to the liver and kidneys. Aspiration of material into lungs may cause pulmonary injury.

SECTION 4 – First Aid Measures

EYES: Flush with large amounts of cool running water for at least 15 minutes while holding upper and lower lids open. Get medical attention.

SKIN: Wash with soap and water. If irritation develops and persists get medical attention.

EXCESSIVE OR ABUSIVE INHALATION: Remove to fresh air. Seek medical attention immediately. If breathing stops give artificial respiration.

INGESTION: Do not induce vomiting. Immediately drink two glasses of water. Never give anything by mouth to an unconscious person. Get medical attention.
