

New Products January 2017

DRAIN MAINTENANCE

CITRA-BURST

#2436

For Degreasing, Deodorizing & Declogging

- Highly concentrated citrus solvent
- Water rinsable and dilutable
- Contains no petroleum distillates
- Biodegradable
- Contains 95.5% orange terpenes
- Food Processing Acceptability: C1

CITRA-BURST is formulated from citrus products and is perfect for a wide variety of uses including drain maintenance and odor control. It will keep drains flowing and grease traps clean and odor free. You can dilute it with either water or petroleum distillates for powerful grease-cutting action with a multitude of applications. With an FPA rating of C1, it can be used for drain/sewer maintenance in federal meat, poultry, egg shell grading and egg product inspection programs where there is no possibility of food contact.

Ideal for: industrial plants, bottling plants, food processing plants, hospitals, bus garages, fleet rental agencies, service stations, garbage truck companies, municipalities, restaurants, automotive plants, wastewater treatment plants

Appearance	Clear, orange liquid
Odor	Strong orange

FLOOR MAINTENANCE

LEVEL PRIMER J42

#2134

Bonding Agent

- VOC compliant
- Excellent bond strength
- Allows up to 24 hours to place underlayment/topping
- Works as both a sealer and bonding agent

LEVEL PRIMER J42 is a concentrated re-emulsifiable primer. It works as both a sealer to help prevent pinholes in floor leveling materials and as a bonding agent to ensure good adhesion to concrete surfaces. This product can be diluted 1:1 with water for porous floors or applied straight to nonporous floors.

Ideal for: commercial buildings, industrial plants, hospitals, schools/ bus barns

Appearance	Blue liquid
Odor	Slight

LEVEL TOPPING

#3135

Cement-Based, Self-Leveling Floor Topping

- Designed for traffic
- High strength
- Excellent bonding
- Pourable or pumpable
- Cement base

LEVEL TOPPING is a premium, cement-based, nonshrink, self-leveling interior floor topping designed as a wearing surface. It only requires the addition of water to produce a flowable mixture that can be poured or pumped onto the floor. It can be used to level or create a solid surface on interior industrial type concrete floors. This product can also be used on new construction projects to correct rough or unfinished concrete and to level out uneven floors. On restoration projects, LEVEL TOPPING can be used to produce a hard, even finish over old concrete.

Ideal for: commercial buildings, industrial plants, hospitals, schools/ bus barns

Appearance	Gray
Odor	Odorless

FLOOR MAINTENANCE

100% EPOXY

#2870

100% Solids, Two-Component Epoxy Coating for Concrete

Kit contains Part A & B

- Has excellent chemical and corrosion resistance
- Highly resistant to scrubbing and scuffing
- High gloss, epoxy seal coating
- Can be used as a coating or filled with aggregate
- Easy to maintain
- For interior use

Ideal for: commercial buildings, industrial plants, hospitals, schools/bus barns

100% EPOXY is a two-component, 100% solids epoxy seal coat that can be used either as a coating or filled with aggregate to provide an endless array of color schemes or patterns. It is designed to protect and beautify interior concrete/masonry. It dries to a heavy-duty, high-gloss film with outstanding resistance to wearing, abrasion and chemicals.

Appearance	Amber, clear liquid
Odor	Amine

SKIN CARE

SMART FOAM

#1139

Aerosol Foam Hand Cleaner

- Lowest cost per hand wash – up to 2,000 hand washes per cartridge
- Customizable volume dispensing from 0.2 ml to 1.5 ml
- Minimal packaging reduces storage space needed
- Up to 6x more concentrated
- New nozzle and valve with every cartridge
- Cartridge empties 100% for no waste
- Light sensor minimizes energy consumption
- Touch-free sensor

Ideal for: school, industrial plants, offices, municipalities

SMART FOAM's revolutionary bag-on-valve, instant-foam technology converts highly concentrated soap into a rich, firm foam with a high cleansing action. The tin cartridge contains a laminated bag that is attached to a valve, nozzle and cap. Pure air is injected between the can and the bag before the bag is filled with soap, giving this product a high pressure that causes the bag to empty completely. The cartridge allows you to adjust the amount of product dispensed per dose so you can tailor the amount dispensed to your specific needs. The recyclable cartridges snap into the dispenser easily.

Use with Smart Foam Dispenser #411901

Appearance	Foam
Odor	Odorless

SMART FOAM DISPENSER

#4119

Touchless Foam Soap Dispenser

- Revolutionary Bag-on-Valve system
- Exclusively touch free
- Sensor with 2-second delay
- Touch-free sensor delivers the precise amount of product every time
- Switches off in the dark to extend battery life
- Dispenser is lockable
- Uses pure air to build up pressure
- Indicator for battery and soap life

Ideal for: school, industrial plants, offices, municipalities

Pro Chem introduces this revolutionary new soap and dispensing system that is sure to become a must have in every restroom. This dispenser saves money, has sensors for a long battery life and indicator lights for both low batteries and low soap. It takes the guesswork out of dispensers. The SMART FOAM DISPENSER allows you to set the soap dosage from 0.2 ml to 1.5 ml. Once set, you can then lock the dispenser.

INDUSTRIAL SPECIALTIES

EPOXY PACK

#2964

2-Part Steel-Filled Epoxy Resin

- Easy 1:1 mixing ratio
- Can be used for horizontal or vertical surfaces
- Spreads easily to fill large or small gaps
- Sets up rapidly for fast return-to-service repairs
- Can be shaped to required profile
- Can be used on virtually any surface
- One-year shelf life
- Do not apply at temperatures below 41°F (5°C)
- Will not shrink
- Ideal for emergency repairs
- Will not rust

Ideal for: metals, ceramics, porcelain, wood, concrete, some rigid, thermo-setting plastics

EPOXY PACK is a two-part, general-purpose, fast-curing epoxy resin with a high steel-alloy content (40%). It is used to make tough, permanent repairs that are rust free and can be machined like steel. When fully cured, conventional metalworking techniques can be used to machine, tap, drill, file, sand and paint the finished repair. This product quickly and easily repairs holes and cracks to virtually any surface.

Appearance	Paste
Odor	Strong sulphurous smell (no odor when cured)

QUICK FIX

#2965

Two-Part Quick Cure Epoxy

- Easy dispensing and no mixing with prefilled cartridges using the dispensing gun and static mixing nozzle
- Excellent chemical resistance
- Cures without shrinking
- Impact resistant

Ideal for: metals, ceramics, wood, concrete, glass, combinations

QUICK FIX
HANDGUN #4965

QUICK FIX
NOZZLE #4963

QUICK FIX is a fast-setting adhesive for bonding and repairing small parts. It will cure in temperatures as low as 41°F (5°C). This product will produce a strong, rigid bond on a variety of surfaces. This product is dispensed with a handgun (#4965) and mixing nozzle (#4963), making it very convenient and cost effective.

Appearance	Light amber liquid
Odor	Characteristic

INSECTICIDES

BUZZ KILL

#1545

Aerosol Instant Kill Wasp & Hornet Spray

- Kills quickly and with residual action
- Kills the entire nest
- Jet spray reaches up to 20 feet above the ground
- Drops wasps, hornets and yellow jackets instantly
- Prevents nesting
- Can be used indoors and outdoors
- Dielectric strength of 49,500 volts, nonconductive
- Triple action formula
- Contains no CFC's or other ozone depleting substances
- VOC compliant
- EPA registered
- Acts as a barrier that prevents insects from entering the building

Ideal for: under eaves, window frames, doors, cracks, holes & crevices

BUZZ KILL contains more active ingredients than other leading wasp and hornet sprays. This revolutionary new product has a more powerful spray, and with its higher concentrations of tetramethrin, permethrin and piperonyl butoxide, nothing kills faster. Its high dielectric strength of 49,500 volts allows it to be sprayed virtually anywhere. For best results, spray in the early morning or late evening when insect activity is minimal.

Appearance	Clear spray/mist
Odor	Solvent

SOLVENTS & DEGREASERS

DOMINATOR

#2651

Concentrated Aggressive Alkaline Cleaner/Degreaser

- Aggressive cleaner
- Highly alkaline
- Cost-effective concentrate
- Extremely versatile
- Super potent, water-based degreaser
- Boosted with extra emulsification ability
- Handles all your heavy-duty cleaning needs
- Can be used with automatic scrubbers, pressure sprayers, trigger sprayers and mops

DOMINATOR is designed for the toughest degreasing applications. It effectively removes grease, oil, gum, resin, ink and almost any other soil from most washable surfaces. It can be applied by almost any means including automatic scrubbers, pressure washers, soaking, trigger sprayers and mops.

Ideal for: grease, oil, gums, resins, ink, motors, concrete floors, nonaluminum equipment, many other soils

Appearance	Red liquid
Odor	Characteristic

PRO TOOLS ELECTRONIC CLEANER

#1681

Aerosol Contact & Circuit Board Cleaner

- Fast drying
- Leaves zero residue
- Noncorrosive
- Nonflammable
- Safe on most plastics
- VOC compliant

PRO TOOLS ELECTRONIC CLEANER is a high purity, rapidly evaporating aerosol electronic contact cleaner and degreaser. It cleans oil, grease, dirt, dust, condensation, and moisture from circuit boards, precision instruments, oxygen equipment, controls, switches, motors, and film. It is also excellent for cleaning and degreasing metal parts and fittings. This solvent system has been tested safe on Neoprene, Buna, Silicone, Styrene, Polystyrene, Butyl and natural rubber, Nylon, Epoxy, PTFE, Polyethylene, Polypropylene, ABS, PVC, Polyurethane, and Hypalon®.

**For other plastics, test on an inconspicuous spot first.

Ideal for: circuit boards, motors, electrical & electronic equipment, contacts, switches, control panels, wire terminals, relays, potentiometers, tuners, circuit breakers, cable ends & receptacles

Appearance	Clear liquid
Odor	Characteristic
