Product Name: ALUM	AI-SEAI	Pro Chem Inc

EYE/FACE PROTECTION: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, or gases. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.

SKIN PROTECTION: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

RESPIRATORY PROTECTION: Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

GENERAL HYGIENE CONSIDERATIONS: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking, and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

10. Stability & Reactivity Information

REACTIVITY:

No specific test data related to reactivity available for this product or its ingredients.

CHEMICAL STABILITY:

The product is stable.

POSSIBILITY OF HAZARDOUS REACTIONS:

Under normal conditions of storage and use, hazardous reactions will not occur. **INCOMPATIBLE MATERIALS:**

Reactive or incompatible with the following materials: oxidizing materials.

CONDITIONS TO AVOID:

No specific data.

DECOMPOSITION PRODUCTS:

Under normal conditions of storage and use, hazardous decomposition products should not be produced.

MOBILI	TY IN SOIL: Soil/water partition coefficient (KOC): There is no data available.
OTHER	ADVERSE EFFECTS:
	No known significant effects or critical hazards.
42 Dia	
	posal Consideration
	neration of waste should be avoided or minimized wherever possible. Disposal of this product, solutions, and any by-products should comply with uirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-
	ble products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewerunless fully compliant with the
requiren	nents of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is
	sible. This material and its container must be disposed of in a safe way. Care should be taken when handling empty containers that have not been
	l or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil,
waterwa	ays, drains, and sewers.
