

BUZZ OFF #1544

Aerosol Wasp and Hornet Killer

Features:

- Kills wasps, hornets and yellow jackets on contact
- Can be used indoors or outdoors
- Dielectric breakdown voltage of 47,300 volts
- Fast acting and kills on contact
- Shoots a forceful stream of 20 feet
- EPA registered
- High pressure spray for quick knockdown
- Kills with residual action as wasps and hornets return to nest
- Contains no CFCs or other ozone depleting substances

Description:

In the past, most wasp and hornet killers were ineffective by not offering quick knockdown or not providing a long enough stream. Pro Chem now offers a product that ensures quick knockdown of wasp and hornets, as well as providing a forceful, true 20-foot stream, minimizing the chance of an accidental sting. BUZZ OFF provides quick, effective control of wasps, hornets and yellow jackets. Residual kill prevents insects from re-inhabiting the nest and eliminates the need for reapplication. This product can be used indoors (attics and other places where nests are built) and outdoors on nests. When sprayed around your home, it acts as a barrier to prevent insects from entering.

Applications:

- Under Eaves
- Doors
- Window Frames
- Cracks, Holes & Crevices

Active Ingredients:

- Tetramethrin: 0.10%
- Permethrin: 0.25%
- Piperonyl Butoxide: 0.50%

For Use By:

- Apartment Complexes
- Parks & Rec
- Golf Courses
- Municipalities
- Schools
- Utility Companies
- Office Buildings
- Amphitheatres
- Warehouses
- Industrial Parks

Product Characteristics:

Appearance:	Clear spray/mist
Odor:	Insecticidal
Specific Gravity:	0.81
Conductivity:	47,300 volts
Vapor Pressure:	Not available.
pH:	Not applicable.
VOC (Wt.%):	98
Relative Density:	0.8
Solubility (water):	Insoluble
Flash Point:	142°F (liquid portion)
Storage:	Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F. Store in a well-ventilated place. Store locked up.
Transport Information:	
UN Number:	1950
Proper Shipping Name:	Aerosols, flammable
Class:	2.1

Directions:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
For Control of Wasps and Hornets: It is preferable to apply this product in the evening after all the insects have returned to the nest. Aim valve opening at nest and depress button, continuing to spray until the nest is soaked with the spray. Repeat as necessary.
