

BELT LUBE: EXPANDABLE HUB BELT LUBRICANT

BELT LUBE guards against the damage caused by ultraviolet rays, environmental conditions and everyday use. This product helps belts resist cracking, dulling, hardening and fading and increases pliability. Its protective shield helps maintain a long lasting attractive appearance on a variety of surfaces that is non-greasy and long lasting. BELT LUBE also makes surfaces anti-static to repel dust and dirt.

DIRECTIONS

Apply a little at a time to inner surface of belt while machinery is in motion. Spray using a back and forth motion until the surface is completely wet. On most belts, the spray may be applied to the sheaves, pulleys, or directly onto the belt itself. Repeat occasionally to maintain full power and optimize belt life. NOTE: In many instances protective guards must be removed in order to apply belt dressing properly. In such cases, please use extreme care to prevent accidents. Be sure to replace guards after treatment.

BELT LUBE
