

# BLITZ #1525

## Aerosol Fire Ant Injector Spray

### Features:

- EPA registered
- Kills on contact
- Has a 4 week residual
- Injection rod allows spray to reach 24 inches in the mound
- Dense, penetrating foam spread throughout the mound, killing the queen and the entire colony
- Protects school children, workers and livestock from fire ants
- Economical: One can treats up to 10 mounds

### Description:

BLITZ contains synergized Permethrin and Tetramethrin to provide quick killing action and residual control. The dense, penetrating foam penetrates deep into the mound and blocks escape routes. One can treats 8 to 10 small mounds, 6 to 8 medium mounds or 4 to 6 large mounds.

### Applications:

- Yards
- Pedestrian Areas
- Playgrounds
- Parks
- Business Parks
- Woodlands

### Solutions:

- Apartment Complexes
- Parks & Rec Agencies
- Landscape Contractors
- Cemeteries
- Public Utilities
- Golf Courses
- Colleges & Universities
- Bus Garages
- Hotels/Motels

### Active Ingredients:

- Tetramethrin: 0.150%
- Permethrin: 0.375%
- Piperonyl Butoxide: 0.750%

### Product Characteristics:

Appearance:	White aerosol foam
Odor:	Mild
Evaporation Rate:	<1
Specific Gravity:	0.975
Solids:	3.5%
Boiling Point:	>212°F (100°C)
Flammability:	Extremely flammable aerosol
VOC:	19%
Vapor Pressure (mm Hg):	0.4
Vapor Density (AIR=1):	<6
Solubility(water):	100%
Volatility including water (%):	98%
pH:	7.5
Cold Stability:	32°F
Storage:	Protect from sunlight. Store in a well-ventilated place. Do not expose to temperatures exceeding 50°C/122°F.
<b>Transport Information:</b>	
Proper Shipping Name:	Aerosols, Ltd. Qty.
UN Number:	UN1950
Hazard Class/Division:	2.1
Packing Group:	Not available.

**DOT Placard:**  
Not regulated.

### Directions:

To treat mounds, use soil injector. To maximize spray distribution, insert injector into the mound full length if possible. Inject the mound at 5-6 sites at a rate of 5-10 seconds spray per site. For very large mounds (over 36 inches in diameter), increase the number of injection sites. Space injection sites in a circular pattern on the mound surface with one site in the center. To quiet active ants on mound surface, sweep surface with spray from a distance of 18 inches. For best results, apply in cool weather or in early morning or late evening hours. Treat new mounds as they appear.

For other application directions refer to the product label.

### Pictograms:

**Signal Word:**  
DANGER

### Personal Protective Equipment Required:
