

C-JOINT HANDGUN & MIXING NOZZLE #4225 #4226

For Use with C-Joint

Features:

- Designed for use with C-JOINT CARTRIDGES
- Features a MK10 mechanism, which minimizes the effort required to dispense the epoxy and gives a 26:1 trigger ratio, which is 60% more powerful than most other guns of its type
- Cast steel drive
- Adjusts easily to various mix ratios
- Ergonomically contoured handle
- Nozzle mixes the epoxy components as they go down the nozzle, so they are mixed when they come out of the end
- C-JOINT HANGUN #4225, C-JOINT MIXING NOZZLE #4226

Description:

C-JOINT HANDGUN is a manual two-component handgun designed to be used with C-JOINT CARTRIDGES. It is engineered for maximum user satisfaction. The gun features a new MK10 mechanism, which minimizes the effort required to dispense the epoxy and gives a 26:1 trigger ratio which is 60% more powerful than most other guns of its type. To cope with this additional power, the mechanism includes a new cast-steel cloth drive. C-JOINT HANDGUN is designed to accommodate different conditions of Ratio-Pak cartridges, the gun is easily modified to accept mix-ratios of 300ML +300ML (1:1), 300ML +150ML (2:1) and 300ML +75ML (4:1). It is die cast in lightweight aluminum. The handle and trigger are ergonomically contoured for all hand sizes, giving comfortable operation over long periods.

Applications:

- Dowel Bars
- Rebar
- Bonding Hardened Concrete
- Binder for Epoxy Materials
- Anchor Bolts
- Sealing Cracks
