

Customer Testimonial:
EDGE (#2800)

For many years, our water treatment plant has been using Pro Chem "Edge" weed killer to eliminate weeds as part of our efforts for proper grounds maintenance to make our facilities always look good and well maintained.

We spray Edge along the fence lines of the perimeter of our property as well as around our buildings and sidewalks. We even spray Edge around the perimeter of our three storm water ponds.

This product is user friendly and really does work well in meeting our Grounds maintenance needs.
