

# ECO RELEASE #2282

## All-Natural Asphalt Release Agent

### Features:

- 100% natural and biodegradable formula
- Prevents rust, corrosion and the accumulation of asphalt deposits
- Extends the working life of tools and equipment
- Highly concentrated – dilutes 1:10 with water
- Seals to protect against asphalt

### Description:

ECO RELEASE provides a molecular film, a heat resistant shield that prevents hot, sticky asphalt from adhering to surfaces. Treated with ECO RELEASE, asphalt just slides right off dump beds, rollers, spreaders, rakes, shovels and other surfaces. With a standard dilution of 1 part concentrate to 10 parts water, ECO RELEASE is far more economical than most other agents. Because it is formulated with an all-natural blend of detergents and emulsifiers, including soybeans, oranges and corn, and surfactants, it conforms to the most demanding environmental safety standards. In recent test trials, participants said, "We used only about one half of the amount we used previously, and it did a much better job."

### Applications:

- Trucks
- Rakes
- Snow Removal Equipment
- Rollers
- Shovels
- Snowmobiles
- Spreaders
- Dump Beds
- Snow Blowers

### Solutions:

This amazing product makes the job of anyone who deals with asphalt or snow removal much easier. It cuts labor costs by making cleanup much easier. This product should be in every workplace that deals with either of these tasks such as DOTs, municipalities, asphalt manufacturing companies, construction companies and many more.

### Product Characteristics:

Appearance:	Clear, yellow liquid
Odor:	Slight soy odor
pH:	9.5 – 11.5
Specific Gravity:	1.03 g/ml
Solubility (water):	Soluble
Flash Point:	>200°F closed cup
VOC Content:	<0.5%
Flash Point:	200°F Closed Cup
Storage:	Keep container closed when not in use. Store in original container. Store in a dry area. Store in a cool area.
<b>Transport Information:</b>	
Proper Shipping Name:	Not regulated for transport
UN Number:	Not regulated for transport
Class:	Not regulated for transport

### Directions:

For easy release of asphalt from truck beds and equipment, dilute ECO RELEASE 1:10 with water (1 quart product to 2.5 gallons of water) and agitate briskly to ensure good mixture. Spray the back of truck beds. Asphalt may be loaded into the truck bed right away.

A 1:10 solution with water may be made to dip or spray onto rakes and shovels while working with asphalt
