

HANDI-GEL #2163

Antibacterial Hand Sanitizer and Waterless Hand Cleaner

Features:

- FDA approved
- Contains 62% Ethyl Alcohol
- Kills 99.99% of germs in seconds
- Not necessary for use

Description:

HANDI-GEL is an FDA compliant, antibacterial hand sanitizer and waterless hand cleaner that effectively kills 99.9% of germs. This thick formula allows for full coverage, penetrating hard-to-reach areas that harbor bacteria between fingers and around fingernails. It contains the CDC recommended 62% of ethyl alcohol which allows the product to dry in seconds. Frequent use is not a problem, as this formula contains Aloe Vera Leaf Extract and Vitamin A and E. These extra emollients replenish skin moisture that the alcohol removes without leaving a sticky residue.

Areas of Use:

- Hospitals
- Waste Water Plants
- Transit Systems
- Schools
- Veterinarians
- Colleges/Universities
- Nursing Homes
- Cab Drivers
- Banks

Applications:

- Health Care Workers
