SECTION 3 – Hazards Information

PRIMARY ROUTES OF ENTRY: Skin contact/absorption and inhalation.

SIGNS AND SYMPTOMS OF OVEREXPOSURE:

Gastrointestinal irritation (nausea, vomiting, diarrhea), irritation to nose, throat, and respiratory tract.

TARGET ORGAN EFFECTS:

Overexposure to this material (or its components) has been suggested as a cause of the following effects in laboratory animals and may aggravate pre-existing disorders of these organs in humans: chronic ingestion may cause kidney and liver lesions at high doses.

IMMEDIATE HEALTH EFFECTS:

INHALATION: Exposure to vapor or mist is possible. Short-term inhalation is not likely to cause harmful effects. Breathing large amounts may be harmful. Symptoms are more typically seen at air concentrations exceeding the recommended exposure limits. Exposure may cause noticeable pain and severe irritation.

EYE CONTACT: Exposure may cause mild skin irritation. Prolonged or repeated exposure may dry the skin. Symptoms may include redness, burning, drying, cracking, and skin burns. Additional symptoms of skin contact may include: allergic reaction. Skin absorption is possible, but harmful effects are not expected from this route of exposure under normal handling and use.

SKIN CONTACT: Single dose oral toxicity is low. Swallowing small amounts during normal handling is not likely to cause harmful effects. Swallowing large amounts may be harmful.

INGESTION: Single dose oral toxicity is low. Swallowing small amounts during normal handling is not likely to cause harmful effects. Swallowing large amounts may be harmful.

REPRODUCTIVE/DEVELOPMENTAL INFORMATION: No data.

CARCINOGENIC INFORMATION: This material is not listed as a carcinogen by IARC, NTP, or OSHA.

LONG TERM EFFECTS: No data.

SECTION 4 – First Aid Measures

EYE CONTACT: Immediately flush with water. Remove contact lenses if applicable, and continue flushing with water. Call a physician if irritation persists.

SKIN CONTACT: Flush with water. Wash thoroughly with soap and water. Call physician if irritation persists.

INHALATION: If symptoms develop, move victim to fresh air. Call a physician if symptoms persist.

INGESTION: **DO NOT INDUCE VOMITING.** Rinse mouth with water, then drink one glass of water. Call physician immediately. Never give anything by mouth if victim is unconscious, is rapidly losing consciousness, or is convulsing.

SECTION 5 – Fire Fighting Measures

FLASH POINT & METHOD USED: No flash at boil (C.C. method)

EXPLOSIVE LIMITS: N/A

AUTOIGNITION TEMPERATURE: N/A

HAZARDOUS PRODUCTS OF COMBUSTION: N/A

EXTINGUISHING MEDIA: N/A

FIRE FIGHTING INSTRUCTIONS: Avoid contact with this material. Avoid walking in spilled material. Wear protective clothing for skin and eyes.

SECTION 6 – Accidental Release Measures

SMALL SPILL: Absorb with an inert solid and scoop up for disposal, and then rinse soiled area with water down the drain. **LARGE SPILL:** Stop leak at the source and collect into a suitable container, then treat as a small spill.

SECTION 7 – Handling and Storage

HANDLING: Containers of this material may be hazardous when emptied. Since emptied containers retain product residues (vapor, liquid, and/or solid), all hazard precautions given in the data sheet must be observed.

STORAGE: Store in a cool, dry place. Keep container closed when not in use.

SECTION 8 – Exposure Controls/Personal Protection

RESPIRATORY PROTECTION: If workplace exposure limits of product or any component are exceeded (see exposure guidelines), NIOSH/OSHA approved air supplied respirator is advised in the absence of proper environmental control. OSHA relations also permit other NIOSH/OSHA respirators (negative pressure type) under specific conditions (see your industrial hygienist). Engineering or administrative controls should be implemented to reduce exposure.

SKIN PROTECTION: Wear rubber gloves (consult your safety equipment supplier). To prevent repeated or prolonged skin contact, wear impervious clothing and boots.

EYE PROTECTION: Chemical splash goggles in compliance with OSHA regulations are advised; however, OSHA regulations also permit other type safety glasses. Consult your safety representative.

ENGINEERING CONTROLS: Provide sufficient mechanical (general and local exhaust) ventilation to maintain exposure below level of overexposure (from known, suspected or apparent adverse effects).
