### PERSONAL PROTECTIVE EQUIPMENT:

**Eye/Face Protection:** Tightly sealed goggles

**Skin Protection:** Body protection: Protective work clothing. Protective gloves. Protective work clothing. The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation. Material of Gloves: The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application. Nitrile rubber, NBR. Penetration Time of Glove Material: The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed. Not suitable are Gloves Made of the Following Materials: PVC gloves.

**Respiratory Protection:** In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use respiratory protective device that is independent of circulating air. Not necessary if room is well-ventilated.

**General Hygiene Measures:** Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing. Wash hands before breaks and at the end of work. Avoid contact with the eyes and skin.
