

SLO-GEL #3905

Air Conditioning Condensate Pan Treatment for Large Units up to 7½ Tons

Features:

- Locks into pan when contact with water occurs so it never moves to block the drain line
- Does not release any chlorine or other noxious fumes
- Starts working immediately and lasts up to 6 months
- Works until completely gone, never has to be removed
- Provides slow and continuous release
- Approved for computer rooms
- Eliminates odors from air conditioner

Description:

One SLO-GEL gel tab treats units up to 7.5 tons for up to 6 months, or the entire, normal cooling season. Simply place a gel tab in the condensate pan where water will drip on it, and it immediately goes to work to eliminate sludge, other accumulations and stale water odors. This prevents costly and time consuming blocked drain lines, overflowing condensate pans and the cleanup that goes with them.

Applications:

- Central Air Conditioners
- Cold Room Coils
- Walk-In Coolers
- Refrigerated Cases
- Commercial Refrigerators
- Thru the Wall Units

For Use By:

- Hospitals
- Office Buildings
- Motels/Hotels
- Industrial Plants
- Schools
- Housing Authorities

Product Characteristics:

Appearance:	Solid
Form:	Solid until mixed with water to form gel
Color:	Various
Odor:	Fresh
pH:	8.3 (10% solution)
Vapor Pressure:	Not available
Specific Gravity:	0.981
Solubility:	100%
Flash Point:	Not available
Storage:	Store locked up. Store away from incompatible materials
Transport Information:	
Proper Shipping Name:	Not regulated as dangerous goods.
UN Number:	Not regulated as dangerous goods.
Class:	Not regulated as dangerous goods.
Packing Group:	Not regulated as dangerous goods.

Directions:

One gel tab lasts for an entire, normal cooling season. Place on SLO-GEL tablet in the condensate pan in a position that allows condensing moisture to drip or run onto the gel tab. The gel tab locks into place, slowly releasing SLO-GEL for a positive prolonged cleaning action.
