

SUDS HAND SOAP #2182

High-Foaming Antimicrobial Hand Cleaner

Features:

- Active ingredient – Chloroxylenol 0.3%
- High foaming
- Contains aloe vera
- Very mild
- Leaves hands smelling fresh and clean
- Available in 1 gallon, 1000 mL and 18 oz bottle

Description:

SUDS is an effective antibacterial hand soap for use in any setting. This high foaming soap spreads rapidly across the hands, covering more skin area and taking less time than traditional cleaners. Traditional liquid soap users often press the dispenser as many as three to four times and use more cleanser than is needed. With SUDS, one press is typical. The foaming action is created by our unique pump system, which takes a measured amount of cleanser, infuses it with air and converts it to a mass of foam soap. This is an antimicrobial and antibacterial soap that contains chloroxylenol, which is effective against E. coli, Staphylococcus aureus, and Pseudomonas aeruginosa.

Applications:

- Hotels/Motels
- Hospitals
- Industrial Facilities
- Office Buildings
- Nursing Homes
- Prisons
- School Systems
- Parks and Recreation
- Public Restrooms

Product Characteristics:

Appearance:	Clear, pink liquid
