## Features:

- Requires no rinsing
- Concentrated
- May be used with or without floor machine
- Removes heavy wax buildup quickly and easily
- Contains no ammonia

## Description:

ZIP STRIP reduces your investment in wax removal - no machines, no stripping pads, no electricity and most importantly, less labor fatigue. The appealing fragrance is pleasant to work with due to the absence of harmful ammonia vapors. ZIP STRIP is a premium non-ammoniated stripper formulated with high concentrations of solvents and amines to penetrate quickly for fast, efficient stripping.

## Applications:

- Schools
- Gas Stations
- Offices
- Grocery Store

Product Characteristics:

| Appearance: | Clear liquid |
| :--- | :--- |
| Odor: | Butyl |
| Boiling Point: | Not available |
| Vapor Pressure: | Not available |
| Solubility (water): | Complete |
| Relative Density: | 1.0 |
| Flash Point: | $144^{\circ} \mathrm{F}$ |
| pH: | $11-12$ |
| VOC Content (Wt. \%): | 37.5 |
| Storage: | Store locked up in a well-ventilated <br> place. Keep container tightly closed. |
| Transport Information: |  |
| UN Number: | 3267 |
| Proper Shipping Corrosive Liquid, Basic, <br> Organic, n.o.s. (contains <br> Name: <br> Class: 8 <br> Packing Group: II |  |

## Directions:

For Moderate Accumulations: Use 1 part stripper to 4 parts hot water.
For Heavy Accumulations: Use 1 part stripper to 1 part hot water.
Mop floor using one of the above solutions freely. Allow to stand 5 to 10 minutes. Remove emulsified wax with a mop or wet vacuum or auto scrubber. Allow floor to dry completely before applying floor finish, as rinsing is not necessary unless powdery residue remains on the floor.

Alkalinity as $\mathrm{Na}_{2} \mathrm{O}: 8.0 \%$
