

BLUE STAR

Multi-Purpose Lubricant

- Highly Water Washout Resistant • Low Separation Rate
- Water Insoluble • Excellent Adhesive and Lubricity

PLACE THIS END IN GUN FIRST

BLUE STAR accommodates a wide range of lubrication needs for agriculture, industry, marine, and automotive fleet applications. This lubricant will pump through a cartridge gun at zero temperatures, yet is suitable for both high and low speed bearings.

A few of its proven uses are: fifth wheels, water pumps, universal joints, wheel bearings, pilot bearings, ball joints, electric motors, steering linkage.

It has a high affinity for metal, forming a tough film and offering a maximum protection. Completely resists chemical change... bleeding, cracking, hardening, thinning, and separating.

A completely waterproof lubricating grease, offering superior resistance to wash-out, and is unaffected even by boiling salt water. It will maintain a protective coating on metal surfaces which will prevent rust and corrosion even under most difficult conditions. Suitable for most bearing applications, ball or roller, high or low speed, sealed or open. Whether the surface to be lubricated turns, slides or oscillates.

NET WEIGHT: 35 Pounds (18.9 L)
HMIS RATING: Health - 1, Flammability - 1,
Reactivity - 0, Personal Protection - B.

#270135

CAUTION:

KEEP OUT OF REACH OF CHILDREN. Do not take internally. Do not ingest. If this should occur, drink large volumes of water and seek medical attention immediately.
