

Features

- Safe for retread chambers
- Highly Concentrated
- Non-corrosive
- Non-toxic
- Odorless
- Non-flammable
- Economical

Description

EXTEND-A-LIFE is a lubricant used on the "envelopes" which encase the tire being retreaded prior to going into a retread chamber. This envelope acts as a seal which tightens around the tire casing while the retread rubber cures within the chamber. Using EXTEND-A-LIFE can prevent envelope tears, while protecting the integrity and quality of the envelopes for continued use. EXTEND-A-LIFE can be used in areas such as Retread Plants.

For Use In:

- Retread Plants

Directions

To Lubricate Envelope: Dilute one part product with up to 8 parts water. Apply to inside of envelope with a quart bottle with trigger sprayer set on the mist setting. Spraying on envelope while hot speeds the drying process. Reapply as needed.

CAUTION:
Use only as directed. Avoid overspray onto floors, equipment controls or any surface which may become hazardous if slippery.

Product Specifications

Appearance	White emulsion
Odor	Odorless
Vapor Density (Air=1)	N/E
Specific Gravity (H2O=1)	1.00
Solubility in Water	Complete
pH Concentrate	4.5
Boiling Point	>212°F
Vapor Pressure of can (mmHg)	N/E
Evaporation Rate (Butyl Acetate=1)	N/A
Active silicone	22.0%
Solids	23.5%
Storage	Cool dry area. Keep from freezing. Keep container closed when not in use.
Flash Point	No Flash
Transportation information	
Class #	55
Proper Shipping Name	Compounds, mold release or dye lubricating other than petroleum

Health	1
Flammability	0
Reactivity	0
Personal Protection	B
