

Product Information Sheet

Features

- Made with natural, non-toxic, and biodegradable active ingredients
- Safe to use around people and animals
- No added fragrance
- Non-alcohol formula
- Non-staining, can be sprayed on fabrics
- Can be applied using a fogger
- Food Processing Acceptable: C1
- Recognized for safer chemistry by the U.S. EPA's Design for the Environment Program

Description

NATURAL AIR air and surface spray effectively removes both organic and inorganic malodors by chemically bonding with odor-causing molecules and eliminating them completely. It is made of completely natural ingredients: water, lime, pine needles, aniseed, clove, and cedarwood. When sprayed on surfaces, it works itself deep into the material to eradicate odors that have penetrated the surface. It is a ready-to-use spray that eliminates a broad spectrum of indoor odors, including those from smoking, body fluids, animals, food, garbage, mold, mildew, chemicals, and paint. This product is acceptable for use in inedible product processing areas, nonprocessing areas, and/or exterior areas of official establishments operating under the Federal meat, poultry, shell egg grading, and egg products inspection programs provided that it is not used to mask odors resulting from insanitary conditions, and that any characteristic odor or fragrance does not penetrate into an edible product area.

Applications

- | | | |
|-------------------------|--------------|---------------------|
| • Schools | • Offices | • Indoor play areas |
| • Day cares | • Hospitals | • Hotels |
| • Health clubs | • Theaters | • Restaurants |
| • Nursing homes | • Cafeterias | • Shopping malls |
| • Colleges/universities | • Rest stops | • Prisons |

Directions

For immediate, targeted odor control, shake and spray into the air or onto water-safe upholstery and fabrics.

Can also be applied through a fogger.

When initially sprayed, there will be a hint of fragrance which will dissipate as the product eliminates the odors. Product does not need to be reapplied until source of odor is reintroduced.

Product Specifications

Appearance	Milky white/opaque white
Odor	Slight citrus or floral
Boiling Point	212°F
Percent Volatile	<1.5%
Melting Point	32°F
Specific Gravity (H2O=1)	0.97
pH	6.4
Solubility in Water	Soluble
Vapor Density (Air=1)	Approximately same as water
Flash Point	None
Storage	Storage of product below 32°F or above 85°F may cause layering.
Transportation information	
Class #	60
Proper Shipping Name	Deodorants, NOI
NMFC	057100-3

Health	0
Flammability	0
Reactivity	0
Personal Protection
