

**Features**

- Displaces moisture
- General purpose corrosion protection
- Non-drying
- Excellence maintenance values
- Environmentally friendly vegetable oil carrier
- Multi metal protection for ferrous metals, zinc, aluminum, galvanized steel, copper, and brass

**Description**

The product should be sprayed directly on metal parts in order to protect them from corrosion. A light film applied in an even layer will provide corrosion protection for up to 2 years when parts are stored indoors, away from rain or salt spray. It is recommended to clean the metal before application of any rust preventative coatings in order to obtain the longest protection.

**Applications**

- Machined parts
- Hinges
- Gears
- Untreated surfaces of equipment
- Bolts
- Firearms

**Directions**

Shake well before and during use. Spray on surface. Leaves a thin oil film.

**Product Characteristics**

AEROSOL CONCENTRATE	
Appearance	Light brown
Odor	Characteristic
Flash Point	77°C (171 °F) (TCC)
Specific Gravity <sub>(H2O=1)@75°F</sub>	None listed
pH	None Listed
Solubility in water	Not miscible or difficult to mix
Boiling Point	Not applicable, as aerosol
TOTAL CONTENTS	
Vapor Pressure of can (psig@70°F)	2 hPa (2 mm Hg)
Total VOC %	None Listed
NFPA CODE 30B RATING	None Listed
Storage	Do not store at temperatures exceeding 120° F (48° C). Exposure to heat may cause bursting. Use only with adequate ventilation.
Transportation information	
Class #	55
NFMC	Consumer Commodity ROM-D

Health	1
Flammability	3
Reactivity	1
Personal Protection	G
