

Vehicle Snow Rake with Handle

Features

- Enables dealerships to clear hundreds of vehicles completely, quickly, and without scratching paint or damaging accessories
- Lightweight head and handle enable more efficient snow removal
- 4 foot handle for maximum reach on full size vehicles

Description

The molded head is made of industrial grade polyethylene foam that endures harsh conditions and hundreds of vehicle clearings. SNO-PRO is approved for use on Class A finishes and received the highest ratings possible from an independent testing lab for non-abrasiveness, freeze resistance and durability. Manufactured with standard threads, SNO-PRO comes with a sturdy handle featuring die-cast metal threads.

Dealership lot crews work faster and more efficiently because SNO-PRO's 5 3/4" x 17" molded head and high-impact face plate weighs only 8 ounces. The light weight avoids costly damage to antennae and accessories that a heavier broom can cause.

Applications

- Auto Dealers
- Municipal Agencies
- Utility Company Fleets
- Park 'n Fly Lots
- Valet Services
- Bus garages
