- Run time of 1 hour 30 minutes for high, 4 hours for medium, & 6 hours for low
- Single tail cap switch
- Drop rating of 2 meters
- Length: 6 inches (152 mm)
- Weight: 3.2 ounces (91 g)
- Handle diameter: 0.6 inches (15 mm)
- Head Diameter: 0.9 inches (23 mm)

### Description:

The MINI-TAC PRO uses a CREE LED rated at 200 lumens with a high-efficiency deep parabolic reflector. The reflector creates a tight, long beam for distance illumination. It can be used as a flashlight or a strobe light. The rugged tail switch makes changing the setting easy and provides momentary or constant-on function along with three brightness settings and a disorientating strobe. This light also comes with a removable pocket clip.

### Applications:

- Industrial
- Military
- Automotive
- Law enforcement
- Public safety
- Utilities
