

Settle Down Demo:

- Prepare two clear jars of water and silt, clay, etc.
- Pour some SETTLE DOWN into one of the jars.
- Compare how quickly the jar with SETTLE DOWN clears versus the jar without SETTLE DOWN.

Testimonial:

"We prefer your product over the one we have been buying from Momar. It works well, comes in the sizes we need and is competitively priced."

Gregg, Wastewater Supervisor

Features:

- Quickly precipitates silt, clay, sludge and other organic solids
- Reduces operating costs
- Nontoxic, biodegradable
- Will not harm fish or wildlife when used as directed
- Fast, efficient clarification of municipal wastewater

Applications:

- Primary & Secondary Clarifiers
- Agitation Basins & Reservoirs
- Settling Ponds
