

# SAFETY GOGGLES – VENTED #4644

## Safety Goggles

### Features:

- 99.9% UV protection for outdoor wear
- Ventilation system minimizes fogging by circulating air throughout
- Droplet and liquid splash protection; rated D3
- Soft rubber gasket forms splash-proof seal
- Low-profile compact design; military styling
- 25 mm elastic headband with easy comfort adjustment
- ANSI-rated hardcoated polycarbonate lens
- Fits over most prescription eyeglasses
- N-FOG™ antifog protection meets or exceeds European EN 166/168

### Description:

Featuring a ventilated lens with our highest-rated N-FOG™ technology plus a durable antiscratch treatment, the Safety Goggles are efficient and hardworking as you are. Its built-in venting system helps reduce the potential for moisture buildup, helping to maintain clear vision. All-day, compliance-promoting comfort is assured — the only material that touches your face is an ultra-soft, conditioned rubber that forms the splash shield. With popular military styling that could just as easily be seen tearing up the slopes or rocking a construction site, the SAFETY GOGGLES-VENTED won't impede your crystal-clear view of the work ahead.

N-FOG™ antifog protection disperses water molecules across the surface of the lens, restricting moisture buildup. Its reverse-engineered venting system promotes directional airflow across the inside surface of the lens, further reducing the potential for moisture buildup to help maintain essential vision. The durable polycarbonate lens provides 99.9% UVA/UVB/UVC protection to help prevent eye damage. With its wide 180-degree peripheral vision and face coverage, the SAFETY GOGGLES-VENTED are also roomy enough to wear over most prescription eyeglasses.

### Certifications & Characteristics:

Excellent antifog protection plus abrasion, chemical and UV resistance. Meets demanding industry test requirements (ANSI Z87.1+, EN166K, EN166N, EN166UV). Meets or exceeds AS/NZS 1337.1:2010 for eye and face protection.

N-FOG™ eyewear is tested under the most stringent antifog standard in the world, the European EN 166/168.

In addition to impact standards, the goggle carries a D3 rating for droplet and splash protection.
