

WEED PRO #3869

Non-Selective, Granular Weed Killer

Features:

- Kills a wide range of annual and perennial weeds and grasses
- Offers total kill with long-lasting residual action
- Easy-to-use granules
- For use on non-cropland areas

Active Ingredients:

- Bromacil 4%

Description:

WEED PRO is a non-selective herbicide that is used for controlling a wide range of annual and perennial weeds and grasses. The active ingredient for this product is Bromacil, which works its way into the soil and into a plant's root system. It kills the plants by interfering with photosynthesis. Typically one application will work for up to one growing season. Eventually the Bromacil will leach below the root system (this can happen faster with higher than normal levels of precipitation). Once below the root level, the herbicide will no longer be effective. Using more than recommended will not make this product last longer because it will leach at the same rate as lower amounts. This granular weed killer is recommended for non-cropland areas away from residential/recreational areas and desired woods, brush and foliage.

Applications:

- Non-Cropland Areas
- Building Perimeters
- Industrial Sites
- Oil & Gas Pipelines
- Utility Poles
- Guard Rails
- Lumber Yards
- Railroad Rights-of-Way
- Loading Ramps
- Parking Lots
- Oil Refineries
- Vacant Lots
- Sign Posts
- Bleachers
- Fence Rows
- Storage Yards
- Tank Farms
- Runways
- Waste Lagoons
- Fire Hydrants, Plus or Walls
- Cooling Towers

For Use By:

- Bus Garages
- Contractors
- Freight Carriers
- Nursing Homes
- Water Treatment Plants
- Warehouses
- City & County Government
- Factories
- Golf Courses
- Correctional Facilities
- DOT's
- Parks & Rec
- Colleges/Universities
- Fleet Operations
- Housing Authorities
- Railroads
- Utility Companies
- Military Facilities

Product Characteristics:

Appearance:	Gray granules
Odor:	Mild
Boiling Point:	No data available
Vapor Pressure:	No data available
Solubility (water):	Soluble
Relative Density:	No data available
Flash Point:	No data available
pH:	No data available
Decomposition Temp:	No data available
Storage:	Store locked up
Transport Information:	
UN Number:	Not regulated for transportation
Proper Shipping Name:	Not regulated for transportation
Class:	Not regulated for transportation
Packing Group:	Not regulated for transportation

Directions:

Apply product as furnished using a seed spreader, fertilizer spreader, shaker type applicator or any equipment which will distribute this product over the area to be treated.

To control annual and most perennial weeds and grasses, apply at a rate of 200 to 300 pounds per acre. On smaller plots, use 1 pound per 150 to 215 ft². Repeat spot treatment may be required when deep-rooted perennial weeds are present. To obtain best results, apply to the ground where it will be absorbed by the roots. Applications early in the season have been found to give results superior to applications made later in the season. This product may, however, be applied at any time of the year. Maximum effectiveness in arid regions is obtained when application is made just prior to the rainy season.

Precaution: Not for use in recreational or residential areas.

DOT Placard:

Not regulated for transportation.

VOC Compliant:

Yes.
