Directions:

DISINFECTION: Thoroughly wet pre-cleaned, hard, non-porous surface with a wipe. Keep wet for 2 minutes (5 minutes if fungus is suspected) and allow to air dry. Use as many wipes as needed for the treated surface to remain wet for the entire contact time. For use as a general disinfectant wipe on hard, non-porous, inanimate surfaces such as stainless steel, Formica, glass tables, chairs, baskets, counter tops, exam tables, cages, toilets, basins, tubs, bed springs, frames, bedside, office furniture, chart racks, equipment, cabinets, door knobs, office machinery, sinks, mirrors, light fixtures, switches, carts, telephones, waste cans, laundry hampers, wheelchairs, walkers, urinals, plastic and other similar hard surfaces. You may use a wipe to pre-clean the surface to be disinfected but thorough re-wiping with a fresh wipe is required for disinfection. Use on food contact surfaces must be followed by a potable water rinse.

DEODORIZING: Wipe hard, non-porous surface thoroughly to eliminate odors from bathrooms, fecal matter, urine, burns, smoke, mildew and mold, decay, stale air, tobacco, sickrooms and musty closets.

CLEANING: To clean surfaces, wipe thoroughly with a fresh wipe, which may be used to deodorize at the same time as cleaning. Use in bathrooms, industrial plants, kitchens, sickrooms, musty closets and similar areas. When used to clean a hard, non-porous surface prior to disinfection, a second wipe must be used for disinfection.
