

Scent Diffuser

# AIRCARE FOR ALL AREAS.

**An overview of Scent Diffuser  
Range for specific spaces.**

# AREAS | SECTOR

We have made it easy for users to select products that are right for their area or business sector. We also recommend the types of fragrances required in some of these venues.

Choose our suited products for these types of areas;

Bedrooms | Hotel lobby, Hotel Suites

Food Areas | Food Service

Gym & Fitness Suites

Meeting Rooms | Conference Suites

Restrooms

Reception & Lounge Areas

Car Dealerships

Medical offices

Assisted Living Centres

Anywhere where you want to improve environment

# FOYERS | LOBBIES | RECEPTIONS (FOR HOSPITALITY AREAS)

The most defining aspect of a guests' experience, whether it's a hotel lobby or office reception area, is how the guest feels during their stay and what they remember about their visit. Through scent, these areas now have the power to influence experiences from the moment a guest steps into the lobby.

# OFFICE | CONFERENCE SPACE | MEETING | WORK SPACE

Particular fragrances have properties that have been proven to energize individuals and improve performance – think lavender & citrus based fragrances. Office spaces should smell uplifting and energizing, promoting motivation. Not only will the mood of workers be enhanced, but staff will achieve a new level of relaxation and satisfaction.

# FITNESS CENTER | GYM | LEISURE | SPA

Fragrances for fitness areas and leisure facilities should be uplifting and also relaxing for the mind. They shouldn't be too powerful or intense, just a right, subtle blend to help stir the senses.

# BATHROOM | RESTROOM | WASHROOM

Scents for restroom areas should provide the impression of 'clean'. This perception is imperative for all shared bathrooms, whether in offices, hospitals or medical buildings. Through the power of scent, the bathroom experience can be pleasant and reassuring leaving the user feeling both clean, fresh and happy.

**RECEPTION & LOUNGE AREAS**  
(7,000 – 76,000 CUBIC FEET)

**GYMS & FITNESS SUITES**

(1,000 – 36,000 CUBIC FEET)

# SCENT EVOKES MEMORIES & LASTING IMPRESSIONS

**The true magic and effect of scent is only just being discovered. In addition to scenting an environment as a solution to mask unpleasant smells and odors, nowadays it is common to view fragrance as an 'immersive user experience' in a location.**

Organizations are realizing the powerful ability of our sense of smell, and using the magic of scent to deeply connect with our emotions. Smell can evoke memories and create lasting impressions, which stimulates emotional responses and triggers certain behaviors.

The magic of scent made simple.

# AIRADICATE™ MALODOR COUNTERACTANT AND ODOR NEUTRALIZER

Evolve fragrance blends contain Airadicate™ malodor counteractant and odor neutralizer, a proprietary ingredient to help stop bad odors in their tracks, allowing our fragrances to be more vibrant and noticeable than they already were.

Airadicate™ is the only complete and effective malodor management technology with a that will change the way brands manage malodors.

It's a hidden, subtle gem in our oils that allows the magic of scent to be made simple, yet very effective.

# WHAT IS MALODOR?

The vast majority of malodors are comprised of water-soluble molecules that are very volatile, are detected at extremely low concentrations, and have aromas that humans find offensively unpleasant. Since these odors are both distinctive and unpleasant trace amounts can be readily detected by our sense of smell.

We work to create formulations targeted for a large number of scent applications where malodor control is vital to the success of the product.

Molecular complex formation renders the malodor molecule 'non-volatile'. Rendered non-volatile, the malodor molecule cannot escape into the atmosphere and reach the nose. Thus, the perception that the malodor is eliminated.

# PIONEERING & PROVEN

The Airadicate™ ingredient in our EVOKE fragrance formulations has been scientifically created to capture malodor molecules and prevent them from reaching the nose, without interfering with the base's functional components. This leads to a cleaner fragrance blend, more noticeable to the nose than formulations without it.

With 90+% efficacy, Airadicate™ is more effective at malodor reduction than the antimicrobial materials that are used in many products. In fact, Airadicate™ outperforms all other malodor technologies on the market today.

**Test results prove it.** Airadicate™ and our EVOKE fragrance oils can offer a unique opportunity to boost your brand's value and perception through the power of scent, with market-leading performance claims and market leading fragrance blends.
