

## **Customer Testimonial #1: EXTEND-A-LIFE (#2293)**

We started using Pro Chem's Extend-a-Life Envelope Lubricant a few months ago. You can use 8 to 1 on the mixture. It works great and saves you a lot of money on envelope lube, more than half the amount of the other lube. I would recommend Extend-a-Life to anybody that retreads tires. Thank you for Extending-the- Life of my budget!

## **Customer Testimonial #2: EXTEND-A-LIFE (#2293)**

I am writing to inform you we have completed our testing process for your Pro Chem Extend-A-Life Envelope Lubricant and am very pleased with the results. We found the product works very well as a release agent allowing the envelopes to be removed with relative ease. After experimenting with several combinations, we have chosen to mist the envelopes after each use with a mixture that is diluted 6 to 1.

By using the product in this manner, we are also enjoying a measurable cost savings when compared to the envelope lubricant we were previously using. In short, the product works very well; it is cost effective and is easy to obtain by adding it to our tread rubber orders or by ordering it directly from your company.

We are now ordering the product in our other retread plants and will be using it in all 7 locations in the near future. Thanks for a great product.
