

FRESH NAP WIPES #SP881801

Antiseptic Towelettes

Features:

- Organic antimicrobial compound
- 5" x 8" wipe
- Safe for skin but tough on germs
- Effective against a broad spectrum of bacteria
- Packets are machine sealed
- Made with Benzalkonium Chloride
- Easy to use when soap and water are unavailable

Description:

FRESH NAP WIPES utilizes Benzalkonium chloride as an ingredient in alcohol free wipes. Benzalkonium chloride is an alcohol free organic antimicrobial compound that has been widely used for more than 60 years. Benzalkonium chloride is safe for the skin, but tough on germs. While alcohol sanitizers utilize 62% or higher alcohol by weight, Benzalkonium chloride only uses 0.1 to 13% of Benzalkonium chloride by weight and provides equivalent microbial protection. Numerous independent lab studies evaluating Benzalkonium chloride within a hand sanitizer application have found that it is effective against a broad spectrum of bacteria.

While alcohol does kill germs, it has no persistency once it dries (in seconds) and becomes less effective. Alcohol based products do not penetrate dirt. Alcohol based sanitizers work best when hands are washed prior to usage. Benzalkonium chloride products are the pragmatic choice when no soap and water is available.

Ingredients: Water, Alcohol, Glycerine, Benzalkonium Chloride

Product Characteristics:

Appearance:	Fluid soaked paper towel
Odor:	Alcohol based
Total Plate Count:	Negative cfu/in
Coliforms:	<10 cfu/g
Staphylococcus Aureus:	<10 cfu/g
Pseudomonas:	<1 cfu/ml
Storage:	Store in ambient conditions.

DOT Placard:

Not available.

VOC Compliant:

No data available.
