5. Fire-Fighting Measures						
SUITABLE FIRE EXTINGUISHING						
Use water spray, fog or foam.						
SPECIFIC HAZARDS ARISING FROM THE CHEMICAL:						
Flammable liquid. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of subsequent explosion. Gas						
may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back, causing fire or explosion.						
Runoff to sewer may create fire or explosion hazard. HAZARDOUS THERMAL DECOMPOSITION PRODUCTS:						
Carbon dioxide, carbon monoxide. SPECIFIC FIREFIGHTING METHODS:						
						Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any
	personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed					
containers cool. SPECIAL PROTECTIVE EQUIPMENT FOR FIREFIGHTERS:						
						Firefighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in a
positive pressure mode.						
6. Accidental Release Measures	6 Accidental Release Measures					
PERSONAL PRECAUTIONS:						
	al protective equipment (se	e Section 8)				
ENVIRONMENTAL PRECAUTION						
Stop all leaks. Isolate haz	ard area. Keep unnecessar	y and unprotected personnel from entering.	liminate all ignition sources. Disperse vapors			
with water spray. Prevent	runoff from entering drains,	sewers, streams or other bodies of water. A	bsorb spill with inert material. Absorb			
unrecoverable product. Tr	ansfer contaminated absort	pent, soil and other materials to containers fo	r disposal.			
7. Handling and Storage						
SAFE HANDLING:						
	a or on clothing. Avoid broad	thing sprays and vapors. Avoid skin contact.	Koon out of roach of childron			
SAFE STORAGE AND INCOMPAT		tilling sprays and vapors. Avoid skin contact.	Reep out of reach of children.			
	-	Store in a cool, dry place, Ground/bond cont	ainer and receiving equipment. Use explosion-			
		ng tools. Take precautionary measures agair

10. Stability & Reactivity Information						
REACTIVITY:						
Under normal conditions of storage and use, hazardous reactions will not occur. CHEMICAL STABILITY:						
Stable under normal conditions.						
CONDITIONS TO AVOID:						
High temperatures, open flames, sparks, welding.						
INCOMPATIBLE MATERIALS:						
Acids and strong oxidizers						

Acids and strong oxidizers.

 CO, CO_2

Vapors may ignite at temperatures exceeding flash point.

11. Toxicological Information

PRIMARY ROUTE OF ENTRY: Skin contact, inhalation, ingestion.

Eyes: May cause serious eye irritation. Symptoms include stinging, tearing and redness.

Skin: May cause skin irritation. Prolonged or repeated contact may dry the skin. Symptoms may include redness, burning, drying of skin and skin burns.

Inhalation: High vapor/aerosol concentrations (>1000 ppm) are irritating to the eyes and respiratory tract. May cause headaches, dizziness, anesthesia, drowsiness, unconsciousness and other central nervous system effects, including death. May cause peripheral nervous system disorder and/or damage.

Ingestion: Harmful or fatal if swallowed. Aspiration hazard - this material can enter lungs during swallowing or vomiting and cause lung inflammation and damage.

ACUTE TOXICITY:

Light Hydrotreated Petroleum Distillate: Inhalation - LC50, rat >7.63 mg/l; Oral - LD50, rat 5.17 g/Kg.

CARCINOGENICITY:

This material is not listed as a carcinogen by IARC, NTP or OSHA.

REPRODUCTIVE TOXICITY:

WARNING: This product contains chemicals known to the State of California to cause birth defects or other reproductive harm.

SPECIFIC TARGET EFFECTS:

Central nervous system.

CHRONIC EFFECTS:

Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Signs and Symptoms of Overexposure: Signs and symptoms of overexposure to this material through breathing, swallowing and/or passage of material through the skin may include stomach or intestinal upset (nausea vomiting, diarrhea), irritation (nose, throat, airways), central nervous system depression (dizziness, drowsiness, weakness, fatique, nausea, headache, unconsciousness)

12. Ecological Information

Not available

13. Disposal Consideration

Waste must be disposed of in accordance with federal, state and local environmental control regulations. See label for further instructions.

14. Transportation Information

Certain shipping modes or package sizes may have exceptions from the transport regulations. The classification provided may not reflect those exceptions and may not apply to all shipping modes or package sizes.

- UN Number: 1268 DOT:
 - UN Proper Shipping Name: Petroleum Distillates, n.o.s. (contains Petroleum Naphtha) Transport Hazard Class(es):

Class: 3

Packing Group: II

15. Regulatory Information

If identified components of this product are CERCLA hazardous substances and/or listed under Sections 302, 304, or 313 of Title III of the Superfund Amendments and Reauthorization Act (SARA) of 1986 (also known as EPCRA, the Emergency Planning and Community Right-To-Know Act), or under California Proposition 65 (Safe Drinking Water and Toxic Enforcement Act), they are listed above in Section 15 of this SDS. If identified components of this product are listed under Section 313, this product contains toxic chemicals subject to the reporting requirements of Section 313. This information must be included in all SDS that are copied and distributed for this material.

Title III Section 311/312

Hazard categories: 40 CFR 370.2: Immediate Hazard - Yes. Delayed Hazard - Yes. Fire Hazard - Yes. Pressure Hazard - No. Reactivity Hazard - No.

T.S.C.A. STATUS: All chemical substances found in this product comply with the Toxic Substances Control Act inventory reporting requirements. **RCRA STATUS:**

Under RCRA, it is the responsibility of the product user to determine at the time of disposal, whether a material containing the product or derived from the product should be classified as a hazardous waste. If this product becomes hazardous waste it would be assigned RCRA Code(s): D001

16. Other Information

DISCLAIMER:

To the best of our knowledge, information contained herein is accurate. However, there is no assumption of liability for the accuracy or completeness of the information contained herein. Final determination of suitability of any material is the sole responsibility of the user. All materials may present unknown hazards and should be used with caution. Although certain hazards are described herein, we cannot guarantee that these are the only hazard, which exists. The information contained in this SDS was obtained from current and reliable sources; however, the data is provided without any warranty, expressed or implied, regarding its correctness or accuracy. Since the conditions or handling, storage and disposal of this product are beyond the control of the manufacturer, the manufacturer will not be responsible for loss, injury, or expense arising out of the products improper use. No warranty, expressed or inferred, regarding the product described in this SDS shall be created or inferred by any statement in this SDS. Various government agencies may have specific regulations regarding the transportation, handling, storage, use, or disposal of this product, which may not be covered by this SDS. The user is responsible for full compliance.
