Product: **Cold Weather Jackets**

Due to supply chain problems that are out of our control, the supply of non-stock (and even stock items to a lesser degree) safety clothing items such as the jackets/sweatshirts, vests, and gloves are rapidly becoming more difficult to get. We were able to secure a generous stock of our stock jacket, as well as two non-stock jackets: "Jacket, Hoodie Black w/Reflective Stripes" SP88700 in sizes Med-5XL and "Jacket-type R CL3 BTM w/Removeable Liner" SP87370 in sizes L-5X (size medium is not available this year and size large is backordered until mid-December). As the sizes of any of these jackets become unavailable, we are marking them inactive in Netsuite because we are unsure when or if we will be able to fill any backorders.

Netsuite is your most up to date source of information so be sure to monitor it daily for style and size availability. Please remember that our stock items, although not available in all sizes all the time, are always going to be the most readily available items because a larger amount of these items was purchased before the Fall/Winter season.
