Date: 10/22/2021

Product: **General Purpose Spill Kit - 6.5 gl**

Product Code: 385606

Due to a material/packaging shortage the supplier of our 6.5 Gallon Spill Kit has made a change from the cylindrical pail that you're all used to seeing to a more square or rectangular looking pail. We have been assured that although the new pail is shorter it is still 6.5 gallons and the contents have not changed. This is a temporary change, they are expecting to have the original pail back in stock in late November. Please feel free to contact us with any questions or concerns.
