

PROTECT YOUR ASSETS FROM SALT & CORROSION

PRO KOTE #2555 - Clear coating used to protect equipment from corrosion due to salt and salt brines. Used to protect and prevent salt from attacking vulnerable metals.

RUST BUSTER #2604 - Used where rust is present to chemically neutralize rust while bonding with metal leaving a finish that when painted will cause paint to last up to 5 times longer and prevent rust from reoccurring. Stunts the growth of rust and leaves a protective coating to prevent against future rusting.

SALT OFF #2486 - Concentrated salt neutralizing rinse additive. Neutralizes salt to prevent corrosion from salt brine and salts used to de-ice highways and bridges. Has added properties designed to penetrate cracks and crevices to effectively remove salt from undercarriages. Safe on all metals and aluminum. Used to protect DOT equipment from corrosion due to applying salts and brines.
