

SmartEquip Network

The SmartEquip Network is a network of equipment rental companies who order their parts and supplies through a streamlined system. The network connects equipment owners and suppliers all on one network, allowing for accurate, efficient procurement with the click of a button. The network was founded in 2000 by the co-founders of Caterpillar Rental Services Network and grew to a billion-dollar company in 2012. Currently, SmartEquip supports more than 600 supplier brands worldwide. This partnership will allow Pro Chem to gain many new customers as well as build on the relationships of the customers we currently service.

Pro Chem provides customers with the “order by item” function to order Pro Chem products either using the product name or product code. They can even use a keyword in the description to find a product.

Pro Chem’s SmartEquip Partnerships:

- Sunbelt Rentals • Yancey • Peterson CAT • Synergy • SitePro Rentals
