

# ICE COMBAT #SP3109405

Exothermic Ice & Snow Melter

## Features:

- Works immediately to melt ice, frost and snow
- Non-corrosive to concrete when used as directed
- Effective in temperatures as low as -25°F
- Generates exothermic heat to power through thick deposits
- Prevents refreezing
- Non-harmful to grass
- Blend of pellets made up of Calcium Chloride, Sodium Chloride and Potassium Chloride

## Description:

ICE COMBAT pellets are a fast and economical way to melt unwanted ice and snow as low as -25°F. The powerful blend of calcium, sodium and potassium chloride is 36 times faster than rock salt and will melt 46 times its weight. These pellets are non-corrosive to concrete and non-harmful to grass.

ICE COMBAT pellets release heat to spread horizontally under the ice formation, so that a large area of ice is loosened by each pellet. Melted ice and snow will not refreeze, even at sub-zero temperatures, for periods up to 12 hours.

## Applications:

- Cement
- Concrete
- Tar
- Wood Surfaces
- Brick
- Black Top
- Flagstone
- Asphalt

## For Use On:

- Sidewalks
- Driveways
- Stairs
- Bridges
- Ramps
- Loading Docks
- Parking Lots

## Product Characteristics:

|                               |   |
|-------------------------------|---|
| Appearance:                   | White solid   |
| Physical State:               | Solid   |
| Odor:                         | No odor   |
| Viscosity:                    | No data available   |
| Boiling Point:                | No data available   |
| Vapor Pressure:               | No data available   |
| Water Solubility:             | Soluble in water  |
| Specific Gravity / Density:   | 2.2 g/ml  |
| Flash Point:                  | No data available   |
| pH:                           | No data available   |
| Storage:                      | Keep container tightly closed. Keep only in original container. |
| <b>Transport Information:</b> |   |
| UN Number:                    | Not regulated for transport                                     |
| Proper Shipping Name:         | Not regulated for transport                                     |
| Class:                        | Not regulated for transport                                     |
| Packing Group:                | Not regulated for transport                                     |

## DOT Placard:

Not available.

## VOC Compliancy:

Not available.

## Directions:

Application rates vary, and quantity and melting action depend upon temperature and thickness of ice and snow. For temperatures above 5°F, use ½ to one pound per square yard of ice. At 0°F, use 1-2 pounds. Spread evenly over the surface with a scoop, shovel or mechanical spreader.

When ICE COMBAT pellets have penetrated and cracked loose the ice layer, remove melted slush. Spread sparingly and evenly with a scoop, shovel or mechanical spreading equipment.
