

ICE FIGHTER

ICE FIGHTER #3463

Granular Ice Melting Compound

ICE FIGHTER is an ice melting compound that consists of multicolor crystals of calcium, potassium, and sodium chlorides that are fortified with UREA MAX. It is effective all the way down to -21°F . It is easy to apply and economical because you can see the coverage, which helps to avoid over application. ICE FIGHTER is safe for use on properly cured concrete and anywhere traction is needed to reduce risk of injury.

- Leaves no oil residue, helps eliminate tracking problems
- Provides instant traction under wheels
- Accidental contact is safe on grass, shrubs, carpets, concrete and skin when used as directed
- Effective in temperatures as low as -21°F

APPLICATIONS

- Concrete
- Sidewalks
- Steps
- Loading docks
- Parking lots
