

PRODUCT BULLETIN

Date: 3/6/2023

Product: **Temp-Plate II, Hi-Temp II & Litho Lube II Updates**

Temp Plate II & Hi Temp II:

We were just notified by the supplier that our **Temp-Plate II & Hi-Temp II** can now make the synthetic blend base oil claim, which means the greases have an added benefit of enhanced longer lasting lubrication. All paperwork and website information has been updated. There were no changes made to the SDS.

Litho Lube II:

Litho Lube II – 65 T can now make a Moly claim, which means it contains the Moly Pro EP additive for extreme pressure and anti-wear advantages, without leaving the dirty residue, like a traditional Moly additive.

Additionally, we were just notified by the supplier that our **Litho Lube II 30 T** and **65 T** can be used on couplings.

All paperwork and website information has been updated. There were no changes made to the SDS.

Thank you Brittany for the helpful information on couplings!
