

# PRODUCT BULLETIN

Date: 4/11/2023

Product: **Airmatic**

Product Code: #1358 and #1332

---

We have been notified by a few customers that the Airmatic cans are not properly fitting into the Airmatic dispensers.

We contacted the vendor and the straws on the Airmatic cans have been changed from the blue straws to the yellow straws. Unfortunately, the manufacturer can no longer get the blue straws anymore. The yellow straws are slightly thicker, so when the nozzle is placed on it during production, it does not push down on the straw quite far enough.

Please let your customers know that they will have to push down on the nozzle with a little bit of force before inserting the can into the dispenser. If they do this, it pushes the nozzle down far enough and the can fits into the dispenser without a problem.

Please see pictures below with the two different colored straws. Feel free to reach out to the office with any questions.
