

## Air Conditioning Condensate Pan Treatments & Protectors

# SLO-GEL #3905

# SLIME-X #3900

## SLIME-X

### Air Conditioning Condensate Pan Protector

- Fastest acting treatment ever
- Non-toxic & noncorrosive
- Helps prevent algae, fungi and Legionnaires' disease-causing bacteria from forming
- Eliminates additional maintenance as there is nothing to throw away
- Keeps drains clear, preventing pan overflow
- One tablet treats up to 5 tons for up to 90 days

**SLIME-X** tablets eliminate maintenance problems such as odors, overflows and water damage caused by plugging drains while preventing slime build up, pan overflow, odors, scale and corrosion. With one tablet treating up to 5 tons for 90 days, using **SLIME-X** is labor saving as there is no monthly maintenance and nothing to discard

## SLO-GEL

### Air Conditioning Condensate Pan Treatment for Large Units up to 7.5 Tons

- Locks into pan when contact with water occurs so it never moves to block the drain line
- Does not release any chlorine or other noxious fumes
- Starts working immediately and lasts up to 6 months
- Works until completely used up, never has to be removed
- Provides slow and continuous release
- Approved for computer rooms
- Eliminates odors from air conditioner

One **SLO-GEL** gel tab treats up to 7.5 tons for up to 6 months, or the entire, normal cooling season. Simply place a gel tab in the condensate pan where water will drip on it, and it immediately goes to work to eliminate sludge, other accumulations, and stale water odors. This prevents costly and time-consuming blocked drain lines, overflowing condensate pans and the cleanup that goes with them.
