7. Handling and Storage

GENERAL:

Wash hands after use. Do not get in eyes, on skin or on clothing. Do not breathe vapors or mists. Use good personal hygiene practices. Eating, drinking and smoking in work areas is prohibited. Remove contaminated clothing and protective equipment before entering eating areas. Eyewash stations and showers should be available in areas where this material is used and stored.

VENTILATION REQUIREMENTS:

Use only with adequate ventilation to control air contaminants to their exposure limits. The use of local ventilation is recommended to control emissions near the source.

STORAGE ROOM REQUIREMENTS:

Do not cut, drill, grind, weld or perform similar operations on or near containers. Do not pressurize containers to empty them. Store at temperatures below 120°F.

8. Exposure Controls / Personal Protection

PERSONAL PROTECTIVE EQUIPMENT:

Eye/Face Protection: Wear eye protection with side shields or goggles. Wear indirect-vent, impact and splash resistant goggles when working with liquids. If additional protection is needed for entire face, use in combination with a face shield.

Skin Protection: Use of gloves approved to relevant standards made from the following materials may provide suitable chemical protection: PVC, neoprene or nitrile rubber gloves. Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, glove thickness, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Use of an apron and over- boots of chemically impervious materials such as neoprene or nitrile rubber is recommended to avoid skin sensitization. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace. Launder soiled clothes or properly disposed of contaminated material, which cannot be decontaminated.

Respiratory Protection: If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker, a respiratory protection program that meets or is equivalent to OSHA 29 CFR 1910.134 and ANSI Z88.2 should be followed. Check with respiratory protective equipment suppliers.

APPROPRIATE ENGINEERING CONTROLS:

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit

10. Stability & Reactivity Information

STABILITY:

Stable under normal storage and handling conditions.

HAZARDOUS REACTIONS/POLYMERIZATION:

Will not occur. CONDITIONS TO AVOID:

Avoid boot area

Avoid heat, sparks, flame, high temperature and contact with incompatible materials. Dropping containers may cause bursting. **INCOMPATIBLE MATERIALS:**

Avoid strong oxidizers, reducers, acids and alkalis.

HAZARDOUS DECOMPOSITION PRODUCTS:

No data available.

11. Toxicological Information

LIKELY ROUTE OF EXPOSURE: Inhalation, ingestion, skin absorption.

SKIN CORROSION/IRRITATION:

Prolonged or repeated contact with this product may dry and/or defat the skin. This product may be harmful if it is absorbed through the skin. Causes mild skin irritation.

0000067-64-1 ACETONE

Can cause skin irritation.

SERIOUS EYE DAMAGE/IRRITATION:

Eye contact may lead to permanent damage if not treated promptly. Liquid or vapors may irritate the eyes.

Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Eye contact may lead to permanent damage if not treated promptly. Based on available data, the classification criteria are not met.

0000067-64-1 ACETONE

Exposure can irritate the eyes.

0064742-47-8 ISOPARAFFINIC PETROLEUM DISTILLATE

The vapour is mildly irritating to the eyes.

RESPIRATORY/SKIN SENSITIZATION:

Based on available data, the classification criteria are not met.

0000067-64-1 ACETONE Can irritate the nose and throat causing coughing and wheezing.

0064742-47-8 ISOPARAFFINIC PETROLEUM DISTILLATE

The substance defats the skin, which may cause dryness or cracking.

GERM CELL MUTAGENICITY:

May cause genetic defects. CARCINOGENICITY:

May cause cancer.

REPRODUCTIVE TOXICITY:

Based on available data, the classification criteria are not met. SPECIFIC TARGET ORGAN TOXICITY - SINGLE EXPOSURE:

Based on available data, the classification criteria are not met.

0000067-64-1 ACETONE May affect the kidneys and liver.

0064742-47-8 ISOPARAFFINIC PETROLEUM DISTILLATE

May cause effects on the central nervous system.

SPECIFIC	C TARGET ORGAN TOXICITY - REPEATED EXPOSURE:
ASPIRAT	Causes damage to organs through prolonged or repeated exposure. Based on available data, the classification criteria are not met. ION HAZARD:
	May be fatal if swallowed and enters airways.
ACUTE T	OXICITY: If inhaled, may cause dizziness, nausea, upper respiratory irritation, drowsiness, mental depression or narcosis, difficulty in breathing,
	irregular heart beats. Based on available data, the classification criteria are not met.
	0064742-47-8 ISOPARAFFINIC PETROLEUM DISTILLATE
	If swallowed, can easily enter the airways and could result in aspiration pneumonitis. Inhalation of high concentrations may cause dizziness,
	anesthesia, unconsciousness. ROUTES OF EXPOSURE: Inhalation, Ingestion, Skin contact, Eye contact
	Aspiration into the lungs when swallowed or vomited may cause chemical pneumonitis which can be fatal.
	0000067-64-1 ACETONE
	Substance can be absorbed into the body by inhalation. 0064742-47-8 ISOPARAFFINIC PETROLEUM DISTILLATE
	The substance can be absorbed into the body by inhalation of its vapour and by ingestion.
POTENTI	IAL HEALTH EFFECTS – MISCELLANEOUS:
	0000067-64-1 ACETONE
	The following medical conditions may be aggravated by exposure: lung disease, eye disorders, skin disorders. Overexposure may cause damage to any of the following organs/systems: blood, central nervous system, eyes, kidneys, liver, respiratory system, skin.
	0008052-42-4 BITUMENS
	Is an IARC carcinogen. Occupational exposures to straight-run bitumens and their emissions during road paving are possibly carcinogenic
	to humans (Group 2B)
	0000067-64-1 ACETONE LC50 (male rat): 30000 ppm (4-hour exposure); cited as 71000 mg/m3 (4-hour exposure) (29)

	LC50 (Rodent - rat, Inhalation): 2180 mg/m3 (4 hours exposure) Toxic effects: Lungs, Thorax, or Respiration - structural or functional change
	in trachea or bronchi.
	LD50 (Rodent - rat, Oral) : >5000 mg/kg, Toxic effects : Behavioral - somnolence (general depressed activity).
	LD50 (Rodent - rabbit, Administration onto the skin) : >2000 mg/kg, Toxic effects : Skin and Appendages - primary irritation (after topical exposure)
	0064742-56-9 MINERAL OIL, PETROLEUM DISTILLATES, SOLVENT-DEWAXED LIGHT PARAFFINIC
	LD50 (oral, rodent - rat): > 5000 mg/kg, Toxic effects : Details of toxic effects not reported other than lethal dose value
	LD50 (dermal, rodent - rabbit): > 5000 mg/kg, Toxic effects : Details of toxic effects not reported other than lethal dose value
12. Ecolo	gical Information
TOXICITY	/: Harmful to aquatic life.
DEDOLOT	Harmful to aquatic life with long lasting effects.
PERSIST	ENCE AND DEGRADABILITY: 0000067-64-1 ACETONE
	91% readily biodegradable, Method: OECD Test Guideline 301B
	Readily biodegradable.
	0064742-47-8 ISOPARAFFINIC PETROLEUM DISTILLATE
BIOACCI	Expected to be inherently biodegradable. The volatile constituents will oxidize rapidly by photochemical reactions in air. JMULATIVE POTENTIAL:
DIOACOU	No data available.
MOBILIT	Y IN SOIL:
	0000067-64-1 ACETONE
	The substance is not PBT / vPvB. 0064742-47-8 ISOPARAFFINIC PETROLEUM DISTILLATE
	Floats on water. Contains volatile constituents. Evaporates within a day from water or soil surfaces. Large volumes may penetrate soil and
	could contaminate groundwater.
	0064742-55-8 MINERAL OIL, PETROLEUM DISTILLATES, HYDROTREATED (MILD) LIGHT PARAFFINIC
	Liquid under most environmental conditions. Floats on water. If it enters soil, it will adsorb to soil particles and will not be mobile.
	0064742-65-0 MINERAL OIL, PETROLEUM DISTILLATES, SOLVENT-DEWAXED HEAVY PARAFFINIC

13. Disposal Consideration WASTE DISPOSAL: Under RCRA it is the responsibility of the user of the product to determine at the time of disposal whether the product meets RCRA criteria for hazardous waste. Waste management should be in full compliance with federal, state and local laws. Empty Containers retain product residue which may exhibit hazards of material, therefore do not pressurize, cut, glaze, weld or use for any other purposes. Return drums to reclamation centers for proper cleaning and reuse.								
14. Transpor	tation Information
