### PRODUCT SOLUTIONS

#### PREVENTION STARTS WITH YOUR HANDS

Hand washing is the best way to reduce microbes on your hands. However, if soap and water are not available, the CDC recommends using an alcohol-based hand sanitizer that contains at least 60% alcohol.

During the flu season, add hand sanitizing stations where people congregate, such as by elevator banks, at reception counters and building entrances/lobbies.

## PRODUCT SOLUTIONS

### GERMS SURVIVE ON SURFACES

Within two to four hours, 40% to 60% of high-touch surfaces in a facility can be contaminated from a virus placed on a single tabletop or door handle. Bacteria and viruses remain active for varying amounts of time on hard surfaces. Things such as environmental conditions impact survival time. These germs can also survive on fabrics. Any cleaning program during the cold and flu season should include steps to address germs on both porous and non-porous surfaces.
