Description:

FRESH SHIELD MAX urinal screens reduce odors for up to 60 days and fits most urinal shapes and sizes. This unique, triple action design offers both a dual fragrance as well as enzyme protection. Losing sensitivity to smells from over exposure, also known as fragrance fatigue, is a common experience when a single fragrance is used. This new design offers a large surface area which provides the initial fragrance delivery and the central core is designed to not only provide the secondary fragrance, but to also reduce bacteria. With the production of enzymes from the naturally occurring bacteria, organic matter and scale build-up is reduced. Use of this screen will make uric salt more soluble, breaking it down so that it flushes through the system rather than creating a blockage.
