

# NSF H1 PRODUCTS

## GENERAL LUBRICANT: INCIDENTAL CONTACT

What is NSF? The National Sanitation Foundation Institute (NSF) demonstrates that food-grade lubricants follow food safety schemes adopted by regulatory agencies around the world. Their registration program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements, including FDA 21 CFR, for appropriate use and ingredient and labeling review. Registration evaluates chemical risks by reviewing product formulations and labels.

What does H1 mean? NSF H1 products are for use in and around food processing areas for lubricating equipment with incidental food contact such as chains, conveyors, gears, cables, bearings, o-rings, pumps and valves. They can also be used as a protective anti-rust film or as a release agent on gaskets or seals of tank closures. H1 lubricants are suitable for "Incidental, technically unavoidable contact with a food product up to 10ppm." In facilities where food and beverage handling occurs, using NSF H1 registered lubricants allows for the elimination of potential contamination. Hazardous substances in and around food and beverage applications can be harmful to public health, therefore, choosing a quality H1 lubricant product not only minimizes the risk of contamination, but also ensures the longevity and performance of your equipment and machinery.

### LOOSEN UP - #1785

#### Aerosol Food Grade Penetrating Oil

- Prevents rust
- Loosens corroded parts
- Penetrates quickly
- Long lasting lubrication
- Makes disassembly and retooling faster
- Complies with FDA regulations CFR Title 21, 178.3570
- Great to use after pressure washing or steam cleaning to help eliminate rust
- Safe for all metal surfaces and most plastics

### PRO LUBE - #2787

#### Multi-purpose, Semi-Synthetic Food Grade Grease

- Prevents rust and corrosion
- Reduces friction and wear
- Extremely water resistant
- Non-melting
- High film strength
- NLGI 2

### PURE LINK - #1786

#### Aerosol Food Grade Semi-Synthetic Chain Lube

- Penetrates, lubricates and protects
- For use on all types of chains and conveyors in food contact areas
- Wide temperature range of 0°F – 325°F
- Resists washout and sling off
- High flash point

### SANI-LUBE - #1098901

#### Aerosol Food Grade Lubricant and Protectant

- Non-toxic, odorless and tasteless
- No solvents added
- Contains no silicones
- Contains no water or filters
- Resists water washout
- Operating range: 0°F to +300°F
- Complies with FDA Regulations, CFR Title 21, paragraphs 172.878 and 178.3620.
