

NO-FLY ZONE #2219001

Drain Fly Repellent with Enzymes

Features:

- Contains citronella and enzymes
- Can be used as a drain fly repellent, drain maintainers and urine eradicator
- Free of surfactants known as APEs (alkylphenol ethoxylates) and NPEs (nonylphenol ethoxylates)
- Acid-free and non-corrosive
- Non-toxic and non-caustic
- Biodegradable

Description:

NO-FLY ZONE is a viscous liquid that clings to pipes and drains to rid them of drain fly infestations, all the while working to break down odor-causing build-up. The product repels annoying and unsanitary drain flies with Citronella, a natural fly repellent. This liquid formula contains enzyme producing bacteria which will multiply and digest organic waste, reduce volume of solids, and kill odors. NO-FLY ZONE contains no acids or corrosives and is biodegradable, non-toxic and non-caustic.

Applications:

- Drains
- Septic Tanks

Product Characteristics:

Appearance:	Cloudy viscous liquid. Particle Size: Not applicable
Odor:	Fragrant (Fragrance)
Relative Density (water = 1):	~ 1.05
Physical State:	Liquid
Flammability (solid, gas):	Not applicable (liquid)
Solubility:	Soluble in water
Relative Density (water = 1):	~ 1.05
Melting Point/Freezing Point:	Not applicable (melting); ~ 32°C (freezing)
pH:	~ 7
Storage:	Store in accordance with local, regional, national and international regulations. Store in a well-ventilated area.
Transport Information:	
UN Number:	-
Proper Shipping Name:	Consumer Commodity (Cleaning Compound)
Class:	None
Packing Group:	-

Directions:

DIRECTIONS FOR USE AS A DRAIN FLY REPELLENT

For best results, apply product at time of lowest drain use, typically at the end of the day. Initially, add 8 oz. to each drain. NO-FLY ZONE will cling to the sides of the drain pipe and allow for a constant release of the citronella fragrance to deter flies throughout the night. It is easily removed with hot water and does not pose any risk of clogging drains. Repeat daily as necessary until desired results are achieved. Then apply 4 to 8 oz. per week as a maintenance dosage.

DIRECTIONS FOR USE AS A DRAIN MAINTAINER

Pump out grease trap, then add 1 qt. per 24 cu. ft. capacity. One week later, begin preventive maintenance schedule: At the end of the day, flush lukewarm water down each drain leading to trap for 5 seconds to clear line of harsh chemicals which can reduce bacterial activity. Dilute 1/2 pint with 1 qt. of lukewarm water and pour approximately half of the solution down each drain. Let mixture remain in drains overnight. The next morning, flush lukewarm water down drains for 5 seconds.

DIRECTIONS FOR USE AS A URINE ERADICATOR

Simply insert a trigger sprayer into the bottle and you have a ready-to-use product which will eliminate the odors produced from the organic material and decomposed salts associated with urine. The area should first be cleaned of excess material. If the area is not moist, use lukewarm water on the area to be treated with product.

SHAKE WELL BEFORE USE.
