

PRODUCT BULLETIN

Date: 6/24/2024
Product: **Germ Stopper and Chain & Cable Lube**
Product Codes: #3369 and #1794

As we mentioned in a previous bulletin last week, Disinfe-X Wipes have been discontinued by the supplier due to EPA regulations. We understand that Germ Stopper is not a perfect replacement due to its higher price and smaller quantity per canister, so we have adjusted the inventory code and the list price for **Germ Stopper**.

We also understand that the delay we are experiencing with XL 866 has impacted many customers as well. To address this, we have adjusted the inventory code and list price of **Chain & Cable Lube** while we await its arrival. We are expecting XL 866 to arrive within the next 6 weeks and we will let you know if there are any updates.

Please reach out to the office with any questions. Thank you again for your patience.

Inventory Code	Product Code	Product Name	Net Weight	Container Size	Package Description	Price
