

PRODUCT BULLETIN

Date: 6/20/2024
Product: **XL 866**
Product Code: 171901

We wanted to send out an update on **XL 866**. While the initial lead time was estimated to be around 4 weeks, an unexpected delay in sourcing a specific raw material has extended the lead time. The raw material should arrive by the end of July to begin production.

In better news, we want to inform everyone that our next shipment of Chain and Cable Lube is on its way and expected to arrive on Monday, June 24. Additionally, we have another future shipment already on order.

We are also looking into adding a new chain and cable lube product to our line, alongside XL 866 and Chain & Cable Lube. We are aiming to introduce this new product soon and will keep you updated on its progress.

Thank you for your understanding and patience.
