Hurricane Relief Donations

Pro Chem has donated **\$25,700** worth of products to support Hurricane Helene and Milton relief efforts, and we continue to keep the residents of Western North Carolina, Augusta, Valdosta and Florida's Gulf Coast in our thoughts and prayers.

Product Blitz

Take advantage of the Product Blitz—50% off! We have updated the inventory remaining on the flyer. We are trying to clear out of the slow moving items from the warehouse to make room for more inventory.

Congratulations on \$3 Million Dollars!

Please join us in congratulating **Kori Abell** on selling **\$3 Million Dollars** with Pro Chem! With her September 2024 sales, Kori reached this impressive milestone. This is a great achievement that reflects Kori's dedication and hard work. Keep it up, Kori!

There's More to Winter Preparation Than Just Ice Melt

It's that time of year again when maintenance supervisors and managers are stocking up on ice melt and road salt. But there is more to preparing for winter weather than having products to melt snow. What about preparing landscaping and construction equipment? Think about protecting metal surfaces from rust and corrosion. Don't forget about making sure vehicles are in good operating condition!

Along with ice melt and road salt, make sure your customers are prepared with these “**must have**” products to make winter a bit more tolerable and manageable:

- **Ice Eraser Plus** quickly melts ice, frost, and snow on windshields, steps, door locks, and more. It prevents ice and frost formation when applied before the storm.
- **Presto** provides quick and easy start-up in cold, wet, or freezing weather for all gasoline and diesel engines.
- **Amped Up** keeps batteries clean and neutralizes acid on terminals and cables of batteries. It eliminates corrosion buildup and provides a residual corrosion preventative.
- **All Coat** prevents snow, slush and ice from sticking to snow removal equipment, such as shovels, blowers and plows.
- **Protect-O-Shield** prevents rust and corrosion on all metal parts. Excellent for indoor, long-term protection.
- **Litho Lube II** is a lithium-based grease for protecting moving parts on heavy-duty equipment. Excellent shearability, shelf life, water resistance & anti-corrosion properties
