

PRODUCT BULLETIN

Date: 10/25/24
Product: **4N1 & Just Rite Aerosol Update**

As many of you know, our supplier of 4N1 is no longer able to supply both 4N1 aerosol or 4N1 bulk. Just last week we sold out of the remaining inventory of 4N1 aerosol. In the short term, we are recommending offering one of our penetrants such as Pro Tools MP Penetrant, Bolt Blaster, Free All II, Slither or Just Rite liquid.

However, in the coming weeks, we plan to introduce both **Just Rite Aerosol** and **4N1 aerosol and liquid**. Both products have been tested, approved, and appear to be excellent additions to the product line.

By adding Just Rite aerosol to the line as well as 4N1, we should be well positioned to have a complete lineup of penetrant lubricants.

Just Rite aerosol will be the exact same formula as Just Rite liquid in an aerosol can and we hope it will be available within the next month. As soon as the product arrives, we will send a sample to all sales associates.

We will continue to send out updates as soon as we have an arrival date for both products as we understand that 4N1 is one of our best-selling products and has been for decades.

While as painful as this process has been over the last few years, 4N1 is one of the last remaining aerosols that will be transitioned from our previous supplier. We would like to thank all of you for your patience and understanding as we have had to go through this painstaking process.

Also, we would like to thank Lori Nelson for testing both Just Rite Aerosol and 4N1.
