

Wednesday, March 26, 2025

Dear Team,

The Environmental Protection Agency (EPA) has announced an extension to the Trichloroethylene (TCE) ban. The new compliance deadline is now **December 18, 2027**. This extension applies specifically to products used on industrial and commercial energized electrical equipment.

Our products—**Electro Blast II, Electro Solv, Electro Solv II, and Pro Tools Solvent Degreaser**—are formulated for use on energized electrical equipment. We will continue to stock these products as long as availability allows while closely monitoring our inventory to ensure all product is depleted before the new compliance date. Please note that this deadline also applies to your customers, meaning they must remove these products from their facilities by **December 18, 2027**.

Given this extension, we have decided to **end our 50% off sale effective April 1, 2025**. With the additional time to sell our current stock, we no longer find it necessary to continue offering discounted pricing.

We have also been informed that due to these new upcoming laws our supplier for **Pro Tools Solvent Degreaser** has decided to discontinue this product. We currently have 86 cans in stock. The product will not be available once this is gone. Please offer **Electro Solv** or **Electro Solv II** in its place. We will also be getting in more **Electro Blast II** from a different supplier but with the same original ingredients. We expect this shipment to arrive in 4-6 weeks.

For reference, we have attached the official EPA letter outlining the new compliance date. Additionally, a link to the full compliance guide is provided below for further details.

We appreciate your patience as we navigate these regulatory changes. Our team is actively sourcing alternative product options to replace these formulations once the ban takes effect, and we will keep you updated on our progress.

Thank you for your cooperation. If you have any questions, please don't hesitate to reach out.
