# DRAIN ZONE #2219001

## Drain Deodorant and Maintainer with Citronella and Enzymes

**Features:**

- Contains citronella and enzymes
- Can be used as a drain maintainers and urine eradicator
- Free of surfactants known as APEs (alkylphenol ethoxylates) and NPEs (nonylphenol ethoxylates)
- Acid-free and non-corrosive
- Non-toxic and non-caustic
- Biodegradable

**Description:**

DRAIN ZONE is a viscous liquid that clings to pipes and drains, all the while working to break down odor-causing build-up. DRAIN ZONE contains citronella, plus enzyme-producing bacteria which will multiply and digest organic waste, reduce volume of solids, and kill odors. DRAIN ZONE contains no acids or corrosives and is biodegradable, non-toxic and non-caustic.

**Applications:**

- Drains
- Septic Tanks

**Product Characteristics:**

| | |
|---|---|
| Physical State: | Gel |
| Appearance: | Clear Green |
| Color: | Green |
| Odor: | Typical |
| pH: | 7.5-8.5 |
| Viscosity: | Slightly Viscous |
| Flammability (solid, gas): | No data available |
| Water Solubility: | Complete |
| Density Lbs/Gal: | 8.5 |
| Storage: | Keep out of the reach of children. Keep containers tightly closed in a cool, well-ventilated place. |
| **Transport Information:** Not regulated | |

**Signal Word:**

WARNING.

**Personal Protective Equipment Required:**

**Directions:**

**DIRECTIONS FOR USE AS A DRAIN DEODORANT**

For best results, apply product at time of lowest drain use, typically at the end of the day. Initially, add 8 oz. to each drain. DRAIN ZONE will cling to the sides of the drain pipe and allow for a constant release of the citronella fragrance throughout the night. It is easily removed with hot water and does not pose any risk of clogging drains. Repeat daily as necessary until desired results are achieved. Then apply 4 to 8 oz. per week as a maintenance dosage.

**DIRECTIONS FOR USE AS A DRAIN MAINTAINER**

Pump out grease trap, then add 1 qt. per 24 cu. ft. capacity. One week later, begin preventive maintenance schedule: At the end of the day, flush lukewarm water down each drain leading to trap for 5 seconds to clear line of harsh chemicals which can reduce bacterial activity. Dilute 1/2 pint with 1 qt. of lukewarm water and pour approximately half of the solution down each drain. Let mixture remain in drains overnight. The next morning, flush lukewarm water down drains for 5 seconds.

**DIRECTIONS FOR USE AS A URINE ERADICATOR**

DRAIN ZONE is a ready-to-use product which will eliminate the odors produced from the organic material and decomposed salts associated with urine. The area should first be cleaned of excess material. If the area is not moist, use lukewarm water on the area to be treated with product.

SHAKE WELL BEFORE USE.
STORE IN AN AREA THAT IS WELL VENTILATED.

**DOT Placard:**
Not regulated

**VOC Compliancy:**
Yes.
